PRO-SPRAY®

Professional Grade Sprinkler Heads

RESIDENTIAL & COMMERCIAL IRRIGATION
Built on Innovation

RUGGED-BODIED AND BUILT-TO-LAST

Built for a long, prosperous life in the most rugged irrigation trenches, Hunter Pro-Spray sprinkler heads are precision engineered to ensure long-lasting, reliable performance in residential applications.

Available in heights from shrub to 12", Pro-Spray heads feature durable construction that is second to none, exclusive body cap design, which won't leak even when loosened, and a reliable, easy to adjust two-piece ratchet.

Pro-Sprays are compatible with Pro Adjustable nozzles, Pro Fixed nozzles, and MP Rotators. All models also include

a user-friendly pull-ring flush cap to keep debris and clogging to a minimum. The Hunter Pro-Spray sprinkler head is compatible with all industry standard female nozzles offering a high degree of flexibility.

Shown here: PRS40 shrub, Pro-Spray 2", PRS30 and PRS40 4", Pro-Spray 6", and PRS30 and PRS40 12" sprays

The Pro-Spray line incorporates a heavy-duty ribbed body and durable cap engineered to withstand the harshest environments.

CO-MOLDED WIPER SEAL

This pressure-activated, multi-function wiper seal was designed to reduce flow-by. The zero flush seal operates at low pressures and allows more sprinkler heads to be installed on the same zone. The wiper seal's design protects the riser when operating, and keeps debris out of the seal when retracted, reducing riser stick-ups.

HEAVY-DUTY SPRING

The strongest retraction spring for positive retraction under any conditions

PRO-SPRAY CHECK VALVE

Optional check valves eliminate leaks and puddles at the lower heads, protecting landscapes from damage and erosion while reducing water waste. Choose from the convenience of factory-installed check valves or the flexibility of field installation.

PRESSURE-REGULATED TO 30 & 40 PSI

Hunter's pressure regulated pop-up sprays are calibrated for the needs of any installation. The PRS30 with the brown cap optimizes performance of your traditional sprays at 30 PSI. The grey-capped PRS40 is designed for the efficient MP Rotator and is the only 40 PSI regulated pop-up on the market today.

BODY CAP WON'T LEAK UNDER HIGH PRESSURE

The Pro-Spray line incorporates a heavy-duty ribbed body and durable cap engineered to withstand the harshest environments, including the rigors of foot traffic and the abuses of heavy machinery. In addition, a multi-thread buttress design provides superior strength in cap-to-body gripping capacity helping the head to withstand high inlet surge pressures.

Competitor

Pro-Spray

PRO-SPRAY® PROFESSIONAL GRADE SPRINKLER HEADS

Pro-Spray

Ready for commercial or residential projects, the Pro-Spray is a rugged and reliable sprinkler for versatile applications. The contractor's choice for years, it was designed with the professional in mind.

Features

- Application: Residential/Commercial
- Models: Shrub, 2", 3", 4", 6", 12"
- Compatible with all female-threaded nozzles
- No side inlet (NSI) version available in 6" and 12" models
- Warranty period: 5 years on all models

Pro-Spray Reclaimed

Pro-Spray models come with optional factory-installed purple reclaimed caps.

PRS30

An in-stem 30 PSI regulator provides optimal pressure to reduce water waste. Other features include a factory-installed check valve and the most powerful retraction spring in its class.

PRS30 Features

- Models: Shrub, 4", 6", 12"
- Pressure regulated at 30 PSI
- No side inlet (NSI) version available in 6" and 12"
- Identification cap is brown for easy field ID

PRS40

Calibrated at a consistent 40 PSI, the PRS40 delivers optimal performance and water efficiency when combined with the revolutionary MP Rotator.

PRS40 Features

- Models: Shrub, 4", 6", 12"
- Pressure regulated at 40 PSI
- Identification cap is gray for easy field ID
- Innovative directional flush plug design
- 6" and 12" Models come standard as no side inlet ensuring proper installation with check valve
- Drain check valve installed (up to 14 ft. of elevation)
